Technical Skills	Python, HTML, CSS
Soft Skills	Leadership, Public Speaking, Teamwork, Problem-Solving, Adaptability
Platform	Docker, Linux, Windows

PROJECTS

Data Download Duplication Alert System

A Data Download Duplication Alert System is designed to detect and alert users about duplicate data entries in real-time, ensuring efficient resource utilization and data quality.

Drowsiness Detection System Using Deep Learning

A drowsiness detection system using deep learning is an innovative solution to prevent accidents caused by drivers falling asleep at the wheel.

AI-Powered Career Recommendation System

AI-powered career recommendation system analyzes user input, matching skills and interests with labor market trends, providing personalized career suggestions for informed decision making.

AI Transport Chat-bot For College

Designed a master chat-bot for our college transport maintenance using Telegram. The chat-bot supports functions such as requesting bus routes, driver information with contact details, and location sharing. During the project expo test, students were able to successfully know their routes.
